Mr. Matthew Smith
Energizer Manufacturing, Inc.
401 Gage Street
Bennington, VT 05201

SUBJECT: Discharge Permit Applications for Name Change
Pretreatment Discharge Permit 3-0303 and NPDES Discharge Permit 3-1163

Dear Mr. Smith:

This letter acknowledges the receipt of 2 applications requesting facility name change for discharge permits 3-0303 and 3-1163. Both permits are currently issued to Energizer Battery Manufacturing, Inc. The Department hereby recognizes the official facility name change to *Energizer Manufacturing, Inc.* for each permit.

Discharge permit 3-0303 does not expire until December 31, 2017 and therefore has been updated with the new facility name (copy enclosed).

Discharge permit 3-1163 was set to expire on December 31, 2012. Energizer submitted a timely and complete renewal application on July 26, 2012 and therefore, may continue operating under discharge permit 3-1163 until the Department acts upon the renewal application. 3 V.S.A. § 814(b). The renewal application for 3-1163 will be processed in the near future, and the name change application will be processed simultaneously with the renewal.

If you have any questions regarding this action, please contact me at 802-490-6106 or by e-mail at carole.fowler@state.vt.us. Thank you.

Respectfully,

A handwritten signature in cursive script that reads "Carole Fowler".

Carole Fowler
Administration & Compliance Section

INFO: Checks 73901556 and 73901557 each for \$240.00 were processed by VT DEC on 7/14/2015
Enclosure: 3-0303 Final Permit with Name Change
Cc: Robert Burleson, Energizer Manufacturing, Inc.

AGENCY OF NATURAL RESOURCES
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
WATERSHED MANAGEMENT DIVISION
ONE NATIONAL LIFE DRIVE, MAIN BUILDING, 2nd FLOOR
MONTPELIER VT 05620-3522

Permit No.: 3-0303
File No.: 02-02
PIN: RU96-0068

Name Change Only
PRETREATMENT DISCHARGE PERMIT

In compliance with the provisions of the Vermont Water Pollution Control Act, as amended, (10 V.S.A. Chapter 47 §1251 et. seq), the Vermont Water Pollution Control Permit Regulations and the federal Clean Water Act, as amended (33 U.S.C. §1251 et.seq.).

Energizer Manufacturing, Inc.
401 Gage Street
Bennington, VT 05201

(hereinafter referred to as the "permittee") is authorized, by the Secretary, Agency of Natural Resources, to discharge from a facility located at:

Gage Street
Bennington, Vermont

to the Town of Bennington Wastewater Treatment Facility in accordance with effluent limitations, monitoring requirements, and other conditions set forth in Parts I, II, III hereof.

This permit shall become effective on date of signing.

This permit and the authorization to discharge shall expire on December 31, 2017.

David K. Mears, Commissioner
Department of Environmental Conservation

By

Ernest F. Kelley, Manager
Wastewater Management Program

Date:

7/16/15

PART I**A. EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS**

1. From January 1, 2013 through December 31, 2017, the permittee is authorized to discharge from outfall serial number S/N 002 wastewater: treated wastewater from the manufacture of miniature alkaline batteries, steam condensate, and contaminated groundwater from site remediation activities. Such discharges shall be limited by the permittee as specified below:
 - a. Such discharges shall be limited and monitored by the permittee as specified below and shall apply during those calendar months when the average monthly production is *equal to or less than 918 kg of cells produced per day or 645 kg of zinc used per day*:

Discharge Limitations			Monitoring Requirements	
Effluent Characteristic	Monthly Average	Maximum Day	Measurement Frequency	Sample Type
Flow	0.062 mgd		Continuous	Total Daily Flow
Chromium (total)	288.53 mg/day	716.73 mg/day	1 x weekly	24 hour composite ⁽¹⁾
Cyanide (total)	146.85 mg/day	348.76 mg/day	1 x weekly	Grab ⁽¹⁾
Manganese (total)	352.49 mg/day	837.34 mg/day	1 x weekly	24 hour composite ⁽¹⁾
Mercury (total)	123.18 mg/day	304.66 mg/day	1 x weekly	24 hour composite ⁽¹⁾
Nickel (total)	1505.18 mg/day	2276.12 mg/day	1 x weekly	24 hour composite ⁽¹⁾
Silver (total)	209.66 mg/day	504.5 mg/day	1 x weekly	24 hour composite ⁽¹⁾
Zinc (total)	752.16 mg/day	1789.33 mg/day	1 x weekly	24 hour composite ⁽¹⁾
Trichloroethene	2.0 mg/l		1 x monthly	Grab ⁽²⁾
Tetrachloroethene	Monitor only		2 x monthly	Grab ⁽²⁾
pH		5.5 to 9.5 SU	Continuous	Daily Max and min ⁽³⁾

- ⁽¹⁾ Samples for metals and cyanide shall be collected at the outlet of Treatment Tank T-01.
- ⁽²⁾ Samples for trichloroethene and tetrachloroethene shall be collected at the outlet of Tank T-02. The activated carbon canisters in the steam condensate and contaminated groundwater treatment systems shall be switched and carbon replaced in Canister #2 when the trichloroethene concentration in the discharge from Canister #1 is 75% of the effluent limit (1.5 mg/l).
- ⁽³⁾ pH shall be measured at the pH "Compliance Probe", prior to discharge to the municipal sewer.

- b. Such discharges shall be limited and monitored by the permittee as specified below and shall apply during those calendar months when the average monthly production is ***greater than 918 kg of cell produced per day or greater than 645 kg of zinc is used per day:***

Discharge Limitations			Monitoring Requirements	
Effluent Characteristic	Monthly Average	Maximum Day	Measurement Frequency	Sample Type
Flow	0.062 mgd		Continuous	Total Daily Flow
Chromium (total)	$(0.12y+0.23x)$	$(0.30y+0.57x)$	1 x weekly	24 hour composite ⁽¹⁾
Cyanide (total)	$(0.16x)$	$(0.38x)$	1 x weekly	Grab ⁽¹⁾
Manganese (total)	$(0.02y+0.37x)$	$(0.046y+0.88x)$	1 x weekly	24 hour composite ⁽¹⁾
Mercury (total)	$(0.006y+0.13x)$	$(0.017y+0.32x)$	1 x weekly	24 hour composite ⁽¹⁾
Nickel (total)	$(1.64x)$	$(2.48x)$	1 x weekly	24 hour composite ⁽¹⁾
Silver (total)	$(0.012y+0.22x)$	$(0.028y+0.53x)$	1 x weekly	24 hour composite ⁽¹⁾
Zinc (total)	$(0.042y+0.79x)$	$(0.099y+1.88x)$	1 x weekly	24 hour composite ⁽¹⁾
Trichloroethene	2.0 mg/l		1 x monthly	Grab ⁽²⁾
Tetrachloroethene	Monitor only		2 x monthly	Grab ⁽²⁾
pH		5.5 to 9.5 SU	Continuous	Daily Max and min ⁽²⁾
x = average kg/day of cells produced during the month				
y= average kg/day of zinc used during the month				
<i>All limitations are mg/day unless otherwise specified</i>				

⁽¹⁾Samples for metals and cyanide shall be collected at the outlet of Treatment Tank T-01.

⁽²⁾Samples for trichloroethene and tetrachloroethene shall be collected at the outlet of Tank T-02. The activated carbon canisters in the steam condensate and contaminated groundwater treatment systems shall be switched and carbon replaced in Canister #2 when the trichloroethene concentration in the discharge from Canister #1 is 75% of the effluent limit (1.5 mg/l).

⁽³⁾pH shall be measured at the pH "Compliance Probe", prior to discharge to the municipal sewer.

Note: S/N 003 has eliminated via consolidation with S/N002.

2. Special Conditions

- a. If the average mass of cells produced per month or zinc used per month significantly increases from the January 2011 through September 2012 levels, then the Agency may reopen this permit and amended these effluent limitations.
- b. The permittee shall report the average kg/day cell production data and kg/day zinc used data on the Discharge Monitoring Report.
- c. If cell production exceeds 918 kg/day or if zinc usage exceeds 645 kg/day, the permittee shall calculate and include the discharge limitations specified in Condition I.A.1.b above on the Discharge Monitoring Report.
- d. If the effluent concentration for any parameter is less than the analytical detection limit, then that parameter shall be deemed to be zero for the purpose of calculating the effluent limits in Condition I.A.1.b above.
- f. The permittee shall continue to implement the solvent management plan as approved by the Agency.

B. REAPPLICATION

If the permittee desires to continue to discharge after the expiration of this permit, the permittee shall reapply on the application forms then in use at least 180 days before this permit expires.

Reapply for a Discharge Permit by: **June 30, 2017**

C. OPERATING FEES

This discharge is subject to operating fees. The permittee shall submit the operating fees in accordance with the procedures provided by the Secretary.

D. MONITORING AND REPORTING**1. Sampling and Analysis**

The sampling, preservation, handling, and analytical methods used shall conform to regulations published pursuant to Section 304(g) of the Clean Water Act, under which such procedures may be required. Guidelines establishing these test procedures have been published in the Code of Federal Regulations, Title 40, Part 136 (Federal Register, Vol. 56, No. 195, July 1, 1999 or as amended).

Samples shall be representative of the volume and quality of effluent discharged over the sampling and reporting period. All samples are to be taken during normal operating hours. The permittee shall identify the effluent sampling location used for each discharge.

2. Reporting

The Permittee is required to submit monitoring results as specified on a Discharge Monitoring Report (Form WR-43). Reports are due on the 15th day of each month, beginning with the month following the effective date of this permit.

If, in any reporting period, there has been no discharge, the permittee must submit that information by the report due date.

Signed copies of these, and all other reports required herein, shall be submitted to the Secretary at the following address:

Agency of Natural Resources
Department of Environmental Conservation
Watershed Management Division
One National Life Drive, Main Building, 2nd Floor
Montpelier VT 05620-3522

and the Bennington Wastewater Treatment Facility

All reports shall be signed:

- a. In the case of corporations, by a principal executive officer of at least the level of vice president, or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility from which the discharge described in the permit form originates;
- b. In the case of a partnership, by a general partner;
- c. In the case of a sole proprietorship, by the proprietor;
- d. In the case of a municipal, State, or other public facility, by either a principal executive officer, ranking elected official, or other duly authorized employee.

3. Recording of Results

The permittee shall maintain records of all information resulting from any monitoring activities required including:

- a. The exact place, date, and time of sampling;
- b. The dates and times the analyses were performed;
- c. The person(s) who performed the analyses;
- d. The analytical techniques and methods used including sample collection handling and preservation techniques;
- e. The results of all required analyses.
- f. The records of monitoring activities and results, including all instrumentation and calibration and maintenance records;

- g. The original calculation and data bench sheets of the operator who performed analysis of the influent or effluent pursuant to requirements of Section I.(A) of this permit.

The results of monitoring requirements shall be reported (in the units specified) on the Vermont reporting form WR-43 or other forms approved by the Secretary.

4. Additional Monitoring

If the permittee monitors any pollutant at the location(s) designated herein more frequently than required by this permit, using approved analytical methods as specified above, the results of such monitoring shall be included in the calculation and reporting of the values required in the Discharge Monitoring Report Form WR-43. Such increased frequency shall also be indicated.

PART II

A. MANAGEMENT REQUIREMENTS

1. Facility Modification / Change in Discharge

All discharges authorized herein shall be consistent with the terms and conditions of this permit. Such a violation may result in the imposition of civil and/or criminal penalties pursuant to 10 V.S.A. Chapters 47, 201 and/or 211. Any anticipated facility expansions, production increases, or process modifications which will result in new, different, or increased discharges of pollutants must be reported by submission of a new permit application or, if such changes will not violate the effluent limitations specified in this permit, by notice to the permit issuing authority of such changes. Following such notice, the permit may be modified to specify and limit any pollutants not previously limited.

2. Noncompliance Notification

In the event the permittee is unable to comply with any of the conditions of this permit due, among other reasons, to:

- a. breakdown or maintenance of waste treatment equipment (biological and physical-chemical systems including, but not limited to, all pipes, transfer pumps, compressors, collection ponds or tanks for the segregation of treated or untreated wastes, ion exchange columns, or carbon absorption units),
- b. accidents caused by human error or negligence, or
- c. other causes such as acts of nature,

the permittee shall notify the Secretary within 24 hours of becoming aware of such condition or by the next business day and shall provide the Secretary with the following information, in writing, within five (5) days:

- i. cause of non-compliance
- ii. a description of the non-complying discharge including its impact upon the receiving water;
- iii. anticipated time the condition of non-compliance is expected to continue or, if such condition has been corrected, the duration of the period of non-compliance;
- iv. steps taken by the permittee to reduce and eliminate the non-complying discharge; and
- v. steps to be taken by the permittee to prevent recurrence of the condition of non-compliance.

3. Operation and Maintenance

All waste collection, control, treatment, and disposal facilities shall be operated in a manner consistent with the following:

- a. The permittee shall, at all times, maintain in good working order and operate as efficiently as possible all treatment or control facilities or systems installed or used by the permittee to achieve compliance with the terms and conditions of this permit.
- b. The permittee shall provide an adequate operating staff which is duly qualified to carry out the operation, maintenance, and testing functions required to insure compliance with the conditions of this permit; and
- c. The operation and maintenance of this facility shall be performed only by qualified personnel. The personnel shall be certified as required under the Vermont Water Pollution Abatement Facility Operator Certification Regulations.

4. Quality Control

The permittee shall calibrate and perform maintenance procedures on all monitoring and analytical instrumentation at regular intervals to ensure accuracy of measurements, or shall ensure that both activities will be conducted.

The permittee shall keep records of these activities and shall provide such records upon request of the Secretary.

For Discharge Point S/N 002, the permittee shall demonstrate the accuracy of the flow measurement device monthly and report the results on the monthly report forms. The acceptable limit of error is $\pm 10\%$.

The permittee shall analyze any additional samples as may be required by the Agency of Natural Resources to ensure analytical quality control.

5. Records Retention

All records and information resulting from the monitoring activities required by this permit including all records of analyses performed, calibration and maintenance of instrumentation, and recordings from continuous monitoring instrumentation shall be retained for a minimum of three (3) years, and shall be submitted to Department representatives upon request. This period shall be extended during the course of unresolved litigation regarding the discharge of pollutants or when requested by the Secretary.

6. Duty to Mitigate

The permittee shall take all reasonable steps to minimize or prevent any adverse impact to the receiving wastewater treatment facility resulting from non-compliance with any condition specified in this permit, including accelerated or additional monitoring as necessary to determine the nature and impact of the non-complying discharge.

7. Bypass

The diversion or bypass of facilities, necessary to maintain compliance with the terms and conditions of this permit, is prohibited, except where authorized under terms and conditions of an emergency pollution permit issued pursuant to 10 V.S.A. §1268.

8. Solids Management

Collected screenings, sludges, and other solids removed in the course of treatment and control of wastewaters shall be stored, treated and disposed of in accord with 10 V.S.A., Chapter 159 and with the terms and conditions of any certification, interim or final, transitional operation authorization or order issued pursuant to 10 V.S.A., Chapter 159 that is in effect on the effective date of this permit or is issued during the term of this permit.

9. Emergency Pollution Permits

Maintenance activities, or emergencies resulting from equipment failure or malfunction, including power outages, which result in an effluent which exceeds the effluent limitations specified herein, shall be considered a violation of the conditions of this permit, unless the permittee immediately applies for, and obtains, an emergency pollution permit under the provisions of 10 V.S.A., Chapter 47, §1268. The permittee shall notify the Department of the emergency situation by the next working day.

10 V.S.A., Chapter 47, Section 1268 reads as follows:

"When a discharge permit holder finds that pollution abatement facilities require repairs, replacement or other corrective action in order for them to continue to meet standards specified in the permit, he may apply in the manner specified by the secretary for an emergency pollution permit for a term sufficient to effect repairs, replacements or other corrective action. The permit may be issued without prior public notice if the nature of the emergency will not provide sufficient time to give notice; provided that the secretary shall give public notice as soon as possible but in any event no later than five days after the effective date of the emergency pollution permit. No emergency pollution permit shall be issued unless the applicant certifies and the secretary finds that:

- (a) there is no present, reasonable alternative means of disposing of the waste other than by discharging it into the waters of the state during the limited period of time of the emergency;
- (b) the denial of an emergency pollution permit would work an extreme hardship upon the applicant;
- (c) the granting of an emergency pollution permit will result in some public benefit;
- (d) the discharge will not be unreasonably harmful to the quality of the receiving waters;
- (e) the cause or reason for the emergency is not due to wilful or intended acts or omissions of the applicant."

Application shall be made to the Secretary of the Agency of Natural Resources, Department of Environmental Conservation, One National Life Drive, Main Building, 2nd Floor, Montpelier VT 05620-3522.

10. Power Failure

In order to maintain compliance with the effluent limitations and prohibitions of this permit, the permittee shall either:

- a. Provide an alternative power source sufficient to operate the wastewater control facilities, or if such alternative power source is not in existence,
- b. Halt, reduce, or otherwise control production and/or all discharges upon the reduction, loss, or failure of the primary source of power to the wastewater control facilities.

B. RESPONSIBILITIES**1. Right of Entry**

The permittee shall allow the Secretary or authorized representative, upon the presentation of proper credentials:

- a. to enter upon the permittee's premises in which an effluent source or any records required to be kept under terms and conditions of the permit are located;
- b. to have access to and copy any records required to be kept under the terms and conditions of the permit;
- c. to inspect any monitoring equipment or method required in the permit; or
- d. to sample any discharge of pollutants.

2. Transfer of Ownership or Control

This permit is not transferable without prior written approval of the Secretary. All application and operating fees must be paid in full prior to transfer of this permit. In the event of any change in control or ownership of facilities from which the authorized discharges emanate, the permittee shall provide a copy of this permit to the succeeding owner or controller and shall send written notification of the change in ownership or control to the Secretary. The permittee shall also inform the prospective owner or operator of their responsibility to make an application for transfer of this permit.

This request for transfer application must include as a minimum:

- a. A properly completed application form provided by the Secretary and the applicable processing fee.
- b. A written statement from the prospective owner or operator certifying:
 - i. The conditions of the operation that contribute to, or affect, the discharge will not be materially different under the new ownership.
 - ii. The prospective owner or operator has read and is familiar with the terms of the permit and agrees to comply with all terms and conditions of the permit.

- iii. The prospective owner or operator has adequate funding to operate and maintain the treatment system and remain in compliance with the terms and conditions of the permit.

- c. The date of the sale or transfer.

The Secretary may require additional information dependent upon the current status of the facility operation, maintenance, and permit compliance.

3. Confidentiality

Pursuant to 10 V.S.A. §1259(b):

“Any records, reports or information obtained under this permit program shall be available to the public for inspection and copying. However, upon a showing satisfactory to the secretary that any records, reports or information or part thereof, other than effluent data, would, if made public, divulge methods or processes entitled to protection as trade secrets, the secretary shall treat and protect those records, reports or information as confidential. Any records, reports or information accorded confidential treatment will be disclosed to authorized representatives of the state and the United States when relevant to any proceedings under this chapter.”

4. Permit Modification

After notice and opportunity for a hearing, this permit may be modified, suspended, or revoked in whole or in part during its term for cause including, but not limited to, the following:

- a. violation of any terms or conditions of this permit;
- b. obtaining this permit by misrepresentation or failure to disclose fully all relevant facts; or
- c. a change in any condition that requires either a temporary or permanent reduction or elimination of the permitted discharge.

5. Toxic Effluent Standards

That if a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standard or prohibition) is established under §307(a) of the Federal Clean Water Act for a toxic pollutant which is present in the permittee's discharge and such standard or prohibition is more stringent than any limitation upon such pollutant in the permit, the secretary shall revise or modify the permit in accordance with the toxic effluent standard or prohibition and so notify the permittee.

6. Civil and Criminal Liability

Except as provided in, "Bypass" (Part II.A., paragraph A.7.), "Power Failure" (Part II.A., paragraph 10.), and "Emergency Pollution Permits" (Part II, paragraph A.9.), nothing in this permit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance. Civil and criminal penalties for non-compliance are provided for in 10 V.S.A. Chapters 47, 201 and 211.

7. Oil and Hazardous Substance Liability

Nothing in this permit shall be construed to preclude the institution of legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under 10 V.S.A. §1281.

8. State Laws

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable State law or regulation under authority preserved by Section 510 of the Clean Water Act.

9. Property Rights

Issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of Federal, State, or local laws or regulations.

10. Severability

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

11. Authority

This permit is issued under authority of 10 V.S.A. §1258 and §1259 of the Vermont Water Pollution Control Act, the Vermont Water Pollution Control Permit Regulations and Section 402 of the Clean Water Act, as amended. 10 V.S.A. §1259 states that: "No person shall discharge any waste, substance, or material into waters of the State, nor shall any person discharge any waste, substance, or material into an injection well or discharge into a publicly owned treatment works any waste which interferes with, passes through without treatment, or is otherwise incompatible with those works or would have a substantial adverse effect on those works or on water quality, without first obtaining a permit for that discharge from the Secretary".

PART III

A. OTHER REQUIREMENTS

This permit shall be modified, or alternatively, revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under Sections 301(b) (2) (C), and (D), 304(b) (2), and 307 (a) (2) of the Clean Water Act, if the effluent standard or limitation so issued or approved:

1. Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or
2. Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of the Vermont Water Pollution Control Act then applicable.

B. DEFINITIONS

For purposes of this permit, the following definitions shall apply.

The Act - The Vermont Water Pollution Control Act, 10 V.S.A. Chapter 47

Annual Average - The highest allowable average of daily discharges calculated as the sum of all daily discharges (mg/l, lbs or gallons) measured during a calendar year divided by the number of daily discharges measured during that year.

Average - The arithmetic means of values taken at the frequency required for each parameter over the specified period.

The Clean Water Act - The federal Clean Water Act, as amended.

Composite Sample - A sample consisting of a minimum of one grab sample per hour collected during a 24-hour period (or lesser period as specified in the section on Monitoring and Reporting) and combined proportionally to flow over that same time period.

Daily Discharge - The discharge of a pollutant measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling.

For pollutants with limitation expressed in pounds the daily discharge is calculated as the total pounds of pollutants discharged over the day.

For pollutants with limitations expressed in mg/l the daily discharge is calculated as the average measurement of the pollutant over the day.

Grab Sample - An individual sample collected in a period of less than 15 minutes.

Incompatible Substance (Pollutant) - Any waste being discharged into the treatment works which interferes with, passes through without treatment, or is otherwise incompatible with said works or would have a substantial adverse effect on these works or on water quality. This includes all pollutants required to be regulated under the Federal Clean Water Act.

Instantaneous Maximum - A value not to be exceeded in any grab sample.

Major Contributing Industry - One that: (1) has a flow of 50,000 gallons or more per average work day; (2) has a flow greater than five percent of the flow carried by the municipal system receiving the waste; (3) has in its wastes a toxic pollutant in toxic amounts as defined in standards issued under Section 307(a) of the Act; or (4) has a significant impact, either singly or in combination with other contributing industries, on a publicly owned treatment works or on the quality of effluent from that treatment works.

Maximum Day (maximum daily discharge limitation) - The highest allowable "daily discharge" (mg/l, lbs or gallons).

Mean - The mean value is the arithmetic mean.

Monthly Average - (Average monthly discharge limitation) - The highest allowable average of daily discharges (mg/l, lbs or gallons) over a calendar month, calculated as the sum of all daily discharges (mg/l, lbs or gallons) measured during a calendar month divided by the number of daily discharges measured during that month.

NPDES - The National Pollutant Discharge Elimination System.

Secretary - The Secretary of the Agency of Natural Resources

State Certifying Agency Agency of Natural Resources
Department of Environmental Conservation
Watershed Management Division
One National Life Drive, Main Building, 2nd Floor
Montpelier VT 05620-3522

Weekly Average - (Average weekly discharge limitation) - The highest allowable average of daily discharges (mg/l, lbs or gallons) over a calendar week, calculated as the sum of all daily discharges (mg/l, lbs or gallons) measured during a calendar week divided by the number of daily discharges measured during that week.

07/2000; u. 09/2012
